

INDUSTRIAL VENDING SOLUTIONS ROBOCRIB® RDS

The AutoCrib® RDS (Remote Dispensing Station) is the industrial vending machine that started it all. Often imitated but never duplicated. The RDS is great for stocking up to 70 SKUs. It's the perfect machine for providing 24-hour a day access to your high value, fast moving, and critical inventory items while maintaining full accountability.

Our standard 12.1 inch touch screen makes selecting and dispensing items easier than ever and can display even

more information. If you are a growing company and want an upgrade path in place from day one, the RDS is a great place to start.

Every RDS comes standard with Golden Eye™, the best verification system in the industry! Golden Eye™ prevents items from getting stuck while avoiding the double drops that plague other systems. The secret is our laser detection system and precision controls you won't see anywhere else.

HOW IT WORKS

1. **Login** – Employees access the RDS by using their employee badge or employee number.
2. **Select Item** – Users then enter the bin number, or scan a barcode on the pick sheet.
3. **Dispense** – The Golden Eye™ system ensures a perfect item vend every time.

Optional – A PIN can also be required as well as prompts to track overhead data like Department Number, Job Number, Customer Number, Tail Number, etc...

FEATURES

- 24-7 Availability - With security and accountability
- Configurations: Standard 60 SKUs (Unique Products) expandable up to 70 SKUs
- Touchscreen with full keyboard
- Handheld barcode scanner - Use picksheets to quickly distinguish between similar looking items. Simply scan the barcode to issue
